

Dear Hiring Manager,

I am writing to apply for the Utility Bill Analyst position at UtiliSave. I am currently a Computer Science student at The College of Idaho and expect to graduate in May 2026. With experience in Python programming, data analysis, research, and technical writing, I am excited about the opportunity to apply my skills in a role focused on solving complex problems and identifying opportunities for clients.

As a Research Intern at The College of Idaho, I have worked with large datasets while studying B-type star spectra and contributing to astronomy research projects. My responsibilities included analyzing observational data, creating scripts to improve research workflows, and writing reports explaining technical findings for broader audiences. Through this work, I developed attention to detail and learned how to communicate complicated ideas in ways that are understandable to people with different backgrounds.

In my coursework and personal projects, I have built a strong foundation in Python and data analysis tools such as pandas, NumPy, and scikit-learn. I have also worked on software projects that required problem-solving, debugging, and organizing complex information into practical solutions. These experiences have helped me become comfortable approaching unfamiliar problems and finding creative ways to solve them.

I am especially interested in UtiliSave because of the company's focus on analytical thinking and uncovering opportunities through detailed data analysis. The chance to work with complex systems and identify ways to help clients save money is exciting to me because it combines technical skills with real-world impact. I am also interested in the opportunity to continue learning through your training program and grow within a company that values innovation and professional development. The position specifically emphasizes analytical thinking and Python skills, which closely align with my experience and interests.

Thank you for considering my application. I would appreciate the opportunity to discuss how my background in computer science, research, and data analysis would allow me to contribute to UtiliSave. I look forward to hearing from you.

Sincerely,

Chase Foreman
